

Diabetes Education for Healthcare Professionals

What's New in Diabetes Management? (Spring)

Number of Sessions: 1

Hours: 7.0

7.0 Contact Hours

Course Description

This class is designed for nurses and other healthcare professionals who work with patients who have diabetes and their families. The program will highlight the current trends in diabetes management, including nutrition and activity guidelines, oral agents and insulin, goal setting, and self-management education principles that must be incorporated into the daily care of people with diabetes. An interactive approach will be used by the instructor to create a learning environment to assist the participant in a better understanding of diabetes management in order to apply the new knowledge and skills in the clinical environment.

Intended Audience

This class is designed for nurses and other healthcare professionals who work with patients who have diabetes and their families.

Current Trends in Diabetes Education and Self-Management (Fall)

Number of Sessions: 1

Hours: 4.0

4 Contact Hours

Course Description

As health care providers, we are responsible for guiding and assisting patients in managing their diabetes. This class will add to your current skills and provide you with the latest tips, strategies, and updates to improve the lives of patients with pre-diabetes and diabetes. You will learn the skills to provide comprehensive care and explain how you can empower your patients to manage their diabetes and improve their quality of life. **This class is designed for licensed clinical staff. Individuals seeking re-certification from the NCBDE can use Continuing Education contact hours received through attendance at an activity provided by an Accredited or Approved Provider of ANCC to meet the Continuing Education requirements for re-certification established by the NCBDE. Prerequisite: Must work with persons who have diabetes and/or their families.**

Intended Audience

This class is designed for licensed clinical staff.
